**ABSTRACT**  
The myCare Start project aims to improve initiation adherence for patients commencing long-term medications in Switzerland via a collaborative care model. The project involves a multi-stakeholder approach, including patients, healthcare providers, and policymakers. The project is currently in progress and will be completed by the end of 2023.

**KEYWORDS**  
Initiation adherence, collaborative care, long-term medications, Switzerland, myCare Start.

## Improving pharmacy care for chronically ill patients prescribed new long-term medications in Switzerland (Protocol)

### BACKGROUND

Suboptimal adherence to long-term medication therapy is a common problem. In Switzerland, adherence to long-term medication therapy is estimated to be 48% to 60%. The myCare Start project aims to improve adherence to long-term medication therapy in Switzerland via a collaborative care model. The project involves a multi-stakeholder approach, including patients, healthcare providers, and policymakers. The project is currently in progress and will be completed by the end of 2023.

### OBJECTIVE

Based on the WHO, this research will use an implementation science approach to develop, implement, and evaluate a collaborative care model for patients commencing long-term medication therapy in Switzerland. The project will involve a multi-stakeholder approach, including patients, healthcare providers, and policymakers. The project is currently in progress and will be completed by the end of 2023.

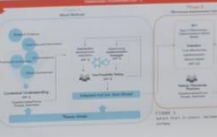

### METHODOLOGY

This project includes the phases of (1) development, (2) implementation, and (3) evaluation. The project will involve a multi-stakeholder approach, including patients, healthcare providers, and policymakers. The project is currently in progress and will be completed by the end of 2023.

**CONCLUSION**  
The myCare Start project aims to improve initiation adherence for patients commencing long-term medications in Switzerland via a collaborative care model. The project involves a multi-stakeholder approach, including patients, healthcare providers, and policymakers. The project is currently in progress and will be completed by the end of 2023.
